

# Miracle Max Plus

## Counter Top Models

The Chanson Miracle Max ionizer is beautifully designed as most advance water ionization system developed by Chanson Water. Features and functionality that will beat the competitors, providing you the best water in your home.

### Miracle Max PLUS

#### Multi-Functional LCD display screen:

Select levels of alkalinity and acidity for different usages. Display pH and ORP level, flow rate, filter life, RAD cleaning, and warning codes to enhance user convenience.

##### Alkaline water level indicator

The machine uses "ALKALINE 1", "ALKALINE 2", "ALKALINE 3", and "ALKALINE 4", to indicate the currently selected alkaline water level.

##### Volume indicator

It indicates the intensity of volume.

##### Flow indicator

It indicates the filter life of the filter in the machine.

##### Alkaline water level indicator

The machine uses "Filtered" to indicate that Filtered is selected.

##### LOCK indicator

The LOCK function is activated when the indicator light is on.

##### Error code indicator

An error code appears when a malfunction is identified.

##### Acidic water level indicator

The machine uses "ACIDIC 1", "ACIDIC 2", "ACIDIC 3" to indicate the currently selected acidic water level.

##### Water deficiency indicator

It lights on when the machine cannot detect the water source.

##### Filter life indicator

It indicates the remaining filter flow.

##### ORP value indicator

It indicates the ORP value corresponding to the current water quality.

##### Electrolyzing indicator

Electrolyzed water is produced when this symbol is in operation.

## 7 Titanium Plates-Electrodes

Chanson Platinum/Titanium Plates use Fritting technology to ensure high levels of ionization. Each large surface area is dipped into platinum and baked in an oven over and over again to form crystals on the plates for better ionization. Chanson Pt/Ti plates have been independently lab tested at 99.9998% pure titanium. A full 364 square inches total ionization surface area that can outperform even an 11-plate ionizer. Larger plates allow for better water flow and ionization!

### Fritting Technology

The crystallization of platinum helps improve ionization while protecting the plates at the same time.

Close up 1000x.

## New Generation SMPS Power Supply

SMPS is known for its lightweight and wide range use of electrical voltage 100V to 240V. It applies stable electric power to maximize ionizing values, and to avoid issues such as overheating, noise and loss of power.

## Onboard Flow Control Valve

Users are now free to control water flow rate to reach the desired pH and ORP outcome. There is nothing more important on a water ionizer than being able to adjust the water flow speed to get the best results.

## Mineral Insert Port

Miracle Max makes both strong acid and alkaline water for anyone with ANY water source. It is powerful enough to be used for disinfecting by doctors, hospitals, dentists, spas, pets, restaurants, the food industry, and home use, simply by inserting food grade salts or calcium powder to reach extreme acidic or alkaline water.

## Full Automatic control by MICRO Processors

The Built-in semiconductor chip (CPU) automatically controls electrode bath and water quality to find the optimal operating condition. CPU controls and speaks different languages, and musical sounds.

## Electro Power Level Adjustment

Change the Power for each ionizing level -This allows users with many different types of water to receive the perfect pH and ORP levels.

## RAD Self-cleaning System

Radial Action De-calcification is another breakthrough utilized on the Miracle Max. The number one enemy of any ionizer is calcium build-up inside the plate cell. Many water ionizers will lose up to 30% performance in the first 3 months of use due to calcium buildup! The RAD self-clean system will come to be legendary for its superior performance, even for the hardest water.

Setting to adjust cleaning every 10 ~ 60 L

After using Acidic 3, automatic cleaning using filtered water to void drinking strong acidic water
